1. Permission granted to use Rain Simulator pictures.

★ Brenda Garcia to cbinette [show details](#) Apr 20 (4 days ago) [Reply](#)

Hello Chad,

I'm part of a senior design team working on improving the rain simulator at the UCF Stormwater Research Lab. I saw that the UCF News Team took some great photos of the simulator and I was wondering if we would be granted rights to use them in our final report? I realize that they were taken by your team and I just want to confirm that you would consent to us using the picture in our report.

Thanks,

Brenda Garcia

★ Chad Binette to me [show details](#) Apr 20 (4 days ago) [Reply](#)

Hi Brenda,

Sure. You are welcome to use them ... for the credit, you can just use the University of Central Florida.

Thanks, and good luck with the report!

Chad

2. Permission requested to use UF Hurricane Simulator photo

★ Brenda Garcia to newsdesk [show details](#) Apr 15 (10 days ago) [Reply](#)

Hello,

I saw the article about the hurricane simulator, I was hoping I could get a quality photo of it? I'm part of a senior design group at UCF working on a rain simulator and we wanted to show other weather simulators in the world and how they are helping us do the research needed to sustain our environment (and in the hurricane simulator's case: save houses!)

Hope to hear from you soon,

Thanks!

Brenda Garcia

Zigbee Diagrams Inbox | X

★ Brenda Garcia to cdiamond [show details](#) Apr 5 [Reply](#)

Hello,

My name is Brenda and I'm a EE student at the University of Central Florida in Orlando. I am currently in my senior year and working on my senior design project. We are trying to integrate Zigbee devices and your website has helped me a lot on learning more about the Zigbee standard. In addition to our project, we are required to write a report about the technology that we plan to use. I was wondering if I would be able to use the diagrams on your website in our report to help explain how we are going to set up our Zigbee network. Of course, you will be referenced in our sources and all credit will be given to you for the diagrams.

Thank you for your time!

Texas Instruments Permissions:

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
